

Empowering Youth

Education, Counseling, and Support Services

YOUTH CONNECT

The Connections by Maryvale treatment team offers weekly drug and alcohol education and prevention services to youth via telehealth, in partnership with Azusa Pacific University. This service is provided at no cost, and participants receive gift cards for their involvement.

INTENSIVE OUTPATIENT SERVICES

Connections by Maryvale's Co-Occurring Intensive Outpatient Program supports adolescents aged 12-17 seeking treatment for mental health and substance use issues. The program offers group, individual, and family therapy, along with case management, drug counseling, and parenting groups. Often referred to as an intensive therapeutic "after-school program," the IOP level of care involves clients completing 3 hours of therapeutic services 3 days a week. The goal is to stabilize youth while providing them with youth-centered treatment and activities for healing. This drop-in clinic provides in-person treatment at Maryvale's Duarte location.

CARE CONNECT

Enhanced Care Management (ECM) is covered by Medi-Cal managed care plans at no cost to members. Our Lead CareManagers provide enrolled members with the resources and support they need to overcome life and health challenges such as accessing mental health services. For instance, members may receive support with accessing mental health services, navigating transportation barriers, or linking to housing resources.

SCHOOL CONNECT

The Connections by Maryvale treatment team provides substance use counseling, as well as prevention and early intervention groups, to at-risk students in Los Angeles County School Districts during the academic year.
